

IES MAR MEDITERRÁNEO (E10077053 - ES)

Our school, IES Mar Mediterráneo, is a secondary school located in the south- east of Spain, in the province of Almería. The school has 600 students who study 1st – 2nd- 3rd and 4th ESO (age group 11-16) and 1st – 2nd Bachillerato (age group 16-18) and 56 teachers. The high school, as I stated before, is located in Aguadulce, which is a town situated very near Almería (11 km). The population is middle-class and the students are nice and in general eager to learn and participate in school life. Parents are very involved in school life and collaborate a lot in all the activities organised. We are all experienced teachers and very keen on doing anything that can help and motivate our students. We will count with the help of all the other teachers who enjoy their work and also think this is an opportunity of motivating students and making them get better at their cultural, linguistic, artistic, digital, social competences and making them more concerned about environmental issues.
