

The fourth and last LTTA was arranged in Finland in May 2024. During the week the students worked in international groups and had some workshops e.g. about recycling, plastic waste and because of the emphasis of this LTTA was spreading the word about the project and issues they have learned, they of course wrote some articles about their experiences. During the week we also had other project related activities e.g. visiting Partaharju district and the neighboring city of Jyväskylä. The students had also a chance to learn something about Finnish traditions e.g. by making Karelian pastries and cinnamon buns together and naturally by having a traditional Finnish sauna evening in Nuuvinniemi.

During the teachers' meetings the teachers went through Step 4 of the project to make sure that everything has been done or to be done during the local activities. The partners also checked the present stage of the eBook and agreed on the next activities that will be prepared for it before the last TPM in Zagreb in June.
